Praise for *Not So Big Solutions for Your Home*

An insider's guide to the ideas behind good design. It's the knowledge that informs the decisions architects and designers make every day... there's enough information here to give even the most uninformed homeowner a solid foundation to build on.

--*The Seattle Times*

If you plan to build a new home or remodel your existing residence, first spend profitable time studying author Sarah Susanka's "Not So Big Solutions for Your Home." Susanka emphasizes modest home component features rather than the big, lavish designs that many other architects seem to favor.

--*The Chicago Tribune*

Your house may have more space than you think it does. It's true. You probably have dead space lurking in the corners of your living room, dining room, even your kitchen. Flip through "Not So Big Solutions for Your House" and you will see.

--*Milwaukee Journal Sentinel*

"Not So Big Solutions for Your Home" is the third book by nationally acclaimed architect-turned-author Sarah Susanka. Although primarily aimed at consumers, the book offers practical design ideas for builders and designers pursuing the "build richer, not bigger" ideal popularized by Susanka's books -- and sought after by many home buyers.

--*Professional Builder*

Dubbed "America's Favorite Home Architect" by *Fine Homebuilding* magazine, where her "Drawing Board" column appears, Susanka here presents a small compilation of 31 essays from the column that offer a number of solutions to household design problems both big and small. Certainly, most homeowners could find something in this title to increase their enjoyment of their home. Susanka's previous two books have sold over half a million copies, so there's sure to be reader interest in this title. Recommended for most public libraries.

More Not So Big Solutions for Your Home

I'm excited to announce that another Not So Big book is on the way. Due out in bookstores March 2, 2010, *More Not So Big Solutions* is a compilation of articles I wrote for Taunton Press' *Inspired House* and *Fine Homebuilding* magazines. Like its predecessor, *Not So Big Solutions for Your Home*, this new book is chock full of valuable information about everything from what to do with a room that's too tall, to dealing with the teardown phenomenon in our inner ring suburbs, to designing a laundry room that works.

Inspired House was a wonderful magazine that ceased publication just a few years ago. It filled a void in the house and home magazine world by dealing with the whole house -- inside and out -- rather than focusing exclusively on interior design issues as many of its competitors do. While the magazine was in print, it developed a devoted following, and I was delighted to learn from The Taunton Press that my regular column, "Not So Big Solutions," was rated the favorite article in every issue.

I was really sad to see *Inspired House* go, as were its subscribers, many of whom expressed their disappointment to me via e-mail or at my public talks and book signings. At some point, I hope there is another magazine like it. But with the challenges facing the magazine industry these days, I realize it may be a few years before we see anything like *Inspired House* again. This is one of the reasons it makes me so happy to give these articles a wider airing in this new book.

What makes *More Not So Big Solutions* (and the first "Solutions" book) special is that I had the opportunity to draw all the illustrations myself. Being able to supplement design concepts with my own graphics allows for a more thorough explanation than a photograph or artist's interpretation could provide.

Although all of my books are filled with details, the two "Solutions" books go a lot further in explaining how to accomplish the particular issue addressed in each chapter. If you're interested in getting down to the nitty-gritty of home design, you'll really appreciate this new book.
